AL AMAL ELECTROMECHANICAL LLC

Where Quality Counts

PRE-QUALIFICATION DOCUMENT

About Al Amal Electromechanical LLC...

Al Amal Electromechanical LLC is a Dubai-based MEP contractor established in 2004, delivering complete MEP services — HVAC, Mechanical, Electrical, and Plumbing systems — across Dubai and Abu Dhabi for over two decades.

We specialise in the design, installation, and maintenance of full MEP systems for the region's most demanding developments — five-star hotels, healthcare facilities, residential and commercial towers, luxury palaces and villas, and industrial projects — alongside major MEP renovation and fit-out works.

Our portfolio includes the Bloom Arjaan by Rotana hotel on Saadiyat Island, Abu Dhabi; the Al Ghurair Palace; and the Livel Residenza tower in JVC, Dubai, among a range of hospitality and commercial developments across the UAE.

Our scope covers the full MEP spectrum: HVAC and ventilation; electrical power and low-current (ELV) systems; plumbing, drainage, and firefighting/fire alarm systems; and long-term MEP maintenance. From design coordination through testing, commissioning, and handover, we deliver work engineered for performance, safety, and lasting value.

Al Amal — where quality counts.

ISO 9001:2008 CERTIFIED

QUALITY MANAGEMENT SYSTEM POLICY

"PERFECT TEAM WORK TO PROVIDE HIGH QUALITY SERVICES TO OUR VALUABLE CLIENTS AS PER THEIR REQUIREMENTS & ON TIME"

OBJECTIVES

-To achieve client satisfaction through quality-based work as per ISO 9001:2008 standard, in accordance with the contract documents, relevant costing, perfect timing, as per the local laws.
-To gain profit by doing the job "right first time", considering employee, customer and environment satisfaction.
-To develop awareness of each employee about quality work and help each of them to be more aware of individual responsibilities for the quality delivery of the work in all project activities required.

Al Amal Electromechanical LLC has established, documented, implemented & maintained quality management system and continually improves its effectiveness covering the requirements of ISO 9001: 2008.

To implement the quality management system, organization has managed to:

1. Identify the processes needed for the quality management system
2. Determine the sequence and interaction of these processes
3. Determine criteria and methods required to ensure the effective operation and control of these processes
4. Ensure the availability of information necessary to support the operation and monitoring of these processes
5. Measure, monitor and analyze these processes
6. Implement actions necessary to achieve the planned results and continual improvement

OUR SAFETY POLICY

It is the policy of Al Amal Electromechanical LLC that work is to be carried out in a safe manner, and that occupational health, safety and environment is to be considered as a pre-requisite in all operations.

The responsibility for implementing health and safety policies rests with the safety officer, in turn is accountable to the Project Manager. The effective implementation and operation of these policies are kept under continual review by the Project Manager who shall receive information from the Safety Officer concerning accidents, dangerous occurrence and overall safety performance.

Within the frame work provided by these policies, all employees have a part to play in maintaining the highest standards of health and safety and in achieving full compliance with legal requirements. The basic need is for every employee to take care of her/himself, his colleagues and the general public.

The whole site, except the site office compound will be a hard hot area and wearing of safety helmets is mandatory.

The safety officer is responsible for ensuring that all employees received the necessary training to carry out their duties in a healthy and safe manner. And that staffs are charged with particular responsibilities for health and safety. They must be able to fulfill those duties and obligations.

The policy forms the basis for a reduction in hazards and an improvement in health, safety and environment at work. Its effectiveness will come from the individual and combined efforts of everybody to make it successful.

ARRANGEMENT FOR IMPLEMENTING THE SITE SAFETY PROGRAM

GENERAL: This part of the site safety program is used to identify the foreseeable hazards of the project and to describe the arrangements for eliminating or controlling the associated risks, thereby satisfying both its statutory and contractual obligations and promoting acceptable standards of health and safety throughout the project.

ISO 9001:2008 CERTIFIED

STATUTORY OBLIGATIONS: Al Amal Electromechanical LLC recognizes the responsibility to comply with all relevant statutory health, safety and environment requirements and will ensure that it observe such requirements accordingly. It will establish and maintain a range of safety management techniques designed to ensure compliance, such as preparation of safety plans, risk assessment safety inspections, safety audits, regular safety meetings and adequate communication systems.

RISK ASSESSMENT: As an integral part of the project accident prevention program the contractor will implement an arrangement to ensure that all activities are subject to a formal assessment of risk prior to the commencement of individual operations.

HEALTHY AND SAFETY MANAGEMENT: The overall responsibility to effectively manage risks to the health and safety of all personnel engaged on the project and others who may be affected by the works is recognized.

SAFETY INSPECTION: All management and supervisory personnel are required to carry out continual health & safety surveillance and take immediate steps to remedy any defects or unsafe practices they observe.

SAFETY AUDITS: In addition to carrying out regular site inspections, the site safety officer will establish and maintain a health and safety audit program designed to provide in depth examinations of all operations and activities on the project including sub-contractors.

HEALTH AND SAFETY INFORMATION: Al Amal Electromechanical LLC recognizes that the provision of adequate health and safety information for all levels of personnel makes a vital contribution towards an effective accident prevention program and will be there for ensure that a suitable structured schedule of information is adopted by all parties throughout the project.

INSTRUCTION AND SUPERVISION: The site safety officer will give clear, unambiguous instruction of the work in hand to the personnel for whom they are responsible, to ensure that all operations are undertaken safety and without risks to health.
